

Exploring innovation and Sustainability

Schedule

- Date: February 24th, 25th and 26th 2025
- Time: 2 PM – 4 PM (UTC) each day
- Location: Riad of Science 4, conference room, Lot 660, Hay Moulay Rachid, UM6P Campus – Benguerir

The second edition of the Winter Workshop, part of the Seasonal workshop serie, will take place on February 24-26th, at UM6P Campus in Benguerir, under the theme of “**Concepts and Applications in Water Technologies**”.

The main purpose of the event is to explore the latest developments of water purification, decontamination and desalination technologies, their research and their practical applications. The workshop is led by imminent expert in the field, Dr. Mona Semsarilar, and will provide insights into the breakthrough’s solutions and trends in water technologies.

The Warmer Workshop is open to Ph.D. students, postdoctoral fellows, scientists, researchers, and professionals in the fields of Chemistry, Materials Science, Water Management and Engineering and is set on hybrid format.

- Engaging presnetations
- Eco-friendly initiatives
- Networking Oppurtunities

Time

Monday

2:00-2:15

2:15-4:00

Speakers & talks

Prof Youssef Habibi

Opening words

Dr. Mona Semsarilar

- Introduction to Membranes and Their Use in Water Purification
- Processes Used in Water Filtration - (Process Type and Pollutant Type)
- Membrane Types in Each Process

Tuesday

2:15-4:00

Dr. Mona Semsarilar

- Membrane Materials
- Polymer Membranes and Their Fabrication Methods
- Challenges of Current Polymer Membranes

Wednesday

2:15-4:00

4:00-4:15

Dr. Mona Semsarilar

- Innovative Membranes
- Emerging Pollutants

Prof Youssef Habibi

Closing words
